
Hair Fall Report

Problem Detected: Hair Fall

You are experiencing excessive hair fall beyond normal shedding. This may be due to stress, hormonal imbalance, poor nutrition, or weak hair roots.

Made with GAMMA

Solution

PRP

Uses your own platelet-rich plasma to deliver concentrated growth factors to the scalp.
Helps control hair fall, strengthen weak roots, and improve overall follicle activity.

GFC

Uses concentrated growth factors to stimulate weak follicles and support natural regrowth.
Helps improve hair thickness, density, and overall hair quality over time.

Mesotherapy

Delivers essential nutrients directly into the scalp to improve nourishment where it is needed most.
Supports scalp health, improves root nutrition, and helps create a better environment for hair growth.

OLT

A non-invasive therapy that supports scalp circulation and root strength.
Helps improve scalp condition, reduce weakness at the root level, and support healthier hair growth.

Combination treatment may be recommended.

Stage & What You Should Do

Early Stage

What to do:
Start with **home remedies and scalp care**. Focus on improving scalp hygiene, reducing stress, maintaining a healthy diet, and following basic doctor-guided hair care habits.

Why this helps:
At this stage, hair fall may often be managed with the right care and lifestyle support before moving to clinical treatments.

Moderate Stage

What to do:
PRP / GFC sessions may be recommended based on your scalp condition and hair loss pattern. These treatments help nourish the follicles and support healthier hair growth.

Why this helps:
They work to strengthen weak follicles, reduce ongoing hair fall, and improve overall hair quality.

Advanced Stage

What to do:
A combination of **PRP + GFC + supportive therapies** may be advised to improve scalp health and support existing follicles.

Why this helps:
This approach helps control further loss, improve density where possible, and support a stronger treatment plan.
